# WELCOME /

Foran Equine has been specialising in healthcare and performance supplements for over 45 years. We work with some of the best horses in the world, specialising in all high-performance disciplines from horse racing, to show jumping, eventing, dressage and breeding.

With the support of our expert technical team, we offer the complete nutritional package, one that you can trust and that puts the needs of your horse at the centre of everything we do.

Gareth Connolly  
**Sales & Marketing Director,**  
**Foran Equine**

# OUR SCIENCE YOUR SUCCESS

For over 45 years, Foran Equine has been applying its science for your success. What began as a select range of equine healthcare products, now extends to over 60 products, meeting all your equine nutrition and healthcare needs.

Our products are scientifically formulated by our experienced in-house team of chemists, nutritionists, and veterinary surgeons. New products are rigorously tested and refined to confirm efficacy and industry compliance. Each product goes through extensive field trials to ensure palatability and ease of use.

To safeguard product quality, Foran Equine products are manufactured in-house following Good Manufacturing Practice (GMP) standards at our licensed manufacturing facilities.

We use only the highest quality ingredients from approved sources. Our unique method of batch preparation ensures longevity of active ingredients, so that all our products reach our customers at the peak of freshness.

Foran Equine is leading the field with our in-house laboratory which crucially screens for Naturally Occurring Prohibited Substances (NOPS). The process also ensures all products meet the highest quality assurance standards and conform to technical specifications.

In addition, all Foran Equine products with the Strict Anti-Doping Formulation Ensured (S.A.F.E) mark are free from prohibited substances and are safe for use in competition and racing horses.

At Foran Equine we deliver worldwide, applying over 45 years of exporting experience to ensure our products reach you on time and in perfect condition.

We appreciate customer interaction and look forward to receiving feedback on our products. Our representatives, sales and technical support teams are here to help with your enquiries and are always on hand to give advice on your supplementation and healthcare needs.

# OUR COMMITMENT TO PRODUCT SAFETY

We at Foran Equine know that in today's professional equine industry, compliance with anti-doping regulations is essential for our customers. This is why all of our products labelled with the ensured (S.A.F.E.) mark have been rigorously tested and are free from prohibited substances.

Stringent testing ensures our product formulations are compliant with current anti-doping regulations and warrant the S.A.F.E. mark. Our company uses advanced analytical techniques; liquid chromatography - mass spectrometry and mass spectrometry (LC - MS/MS) to systematically test products.

In addition, product batch samples are sent at random to the international reference laboratory, Laboratoire des Courses Hippiques (LCH), to confirm the absence of prohibited doping substances in our products.

Foran Equine products with the S.A.F.E. mark are safe to use in all racing and competing horses.

EQUINE  
SUPPLEMENTS  
& HEALTHCARE

For over 45 years, Foran Equine has been applying its science for your success. What began as a select range of equine healthcare products is now an extensive portfolio extending over two ranges catering for all horses.

## **FOR-SUCCESS**

A range of products formulated for supporting and achieving success

## **FOR-VALUE**

A range of products formulated for every day nutritional requirements

# FOR-SUCCESS

High-quality supplements  
designed for your success.

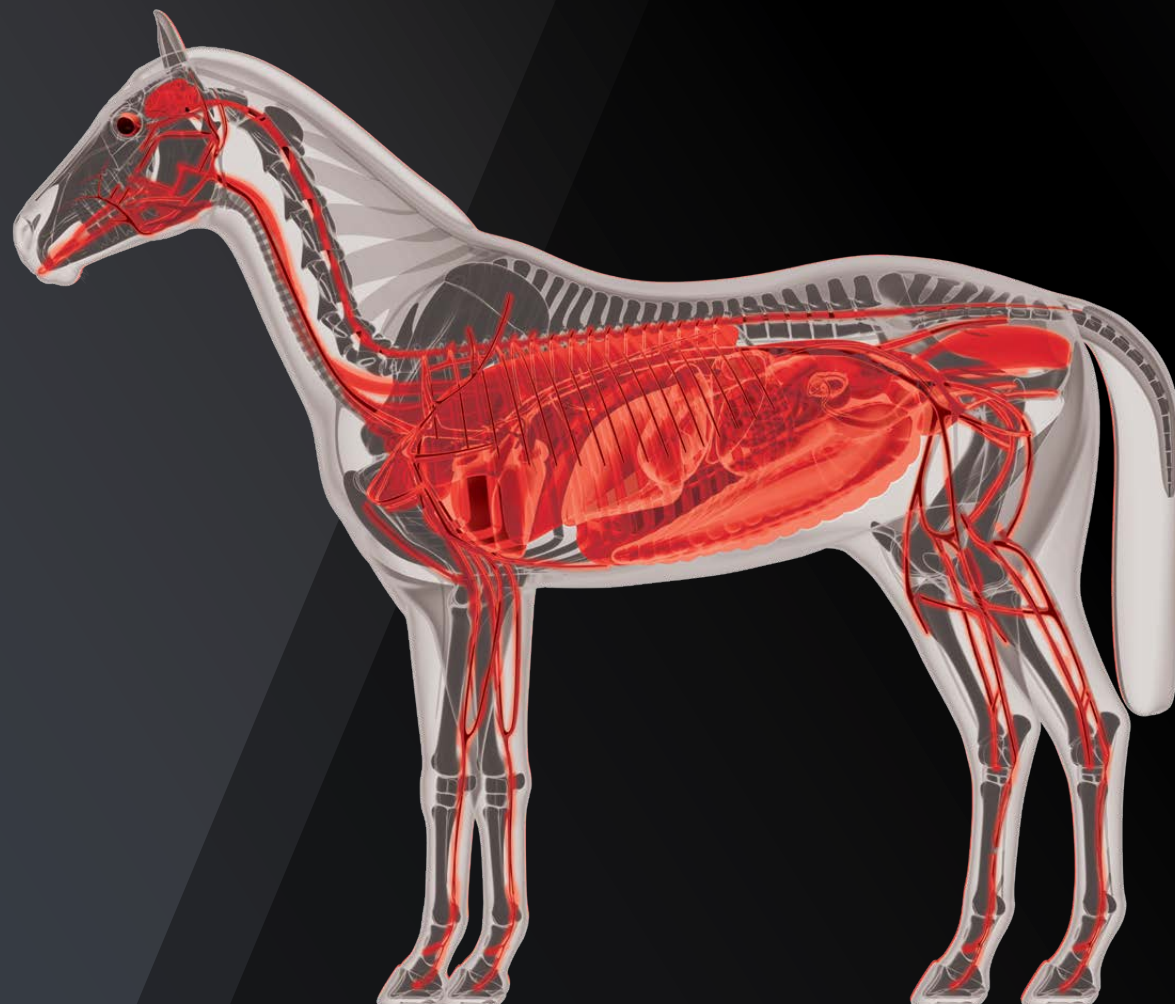

# VITAMINS & MINERALS

Vitamins and minerals are essential micronutrients, required by the body for daily metabolism, growth, repair and health maintenance. Vitamins, which function as enzymes or cofactors in metabolism, are required on a daily basis.

Over 13 minerals essential to normal body function must all be supplied through the horse's diet.

At times of increased metabolic demand, such as pregnancy, lactation, growth, illness recovery or athletic performance, there is an increased need for vitamins and minerals. Proper supplementation can ensure all these metabolic needs are met.

- > **HEALTHY SKIN & COAT**
- > **SUPPORT HEALTHY APPETITE**
- > **RED BLOOD CELL FORMATION**
- > **ENERGY BOOST**
- > **ANTIOXIDANT PROTECTION**

# CHEVINAL

The ultimate liquid multivitamin, mineral and essential amino acid supplement for optimal nutrition

## IDEAL FOR

- > Performance horses where dietary intake does not meet micro-nutrient demands
- > Sales preparation
- > Show horses
- > Mares
- > Stallions
- > Native breeds prone to obesity

## FEATURES & BENEFITS

- > **Scientifically formulated** – for optimal equine nutrition
- > **Palatable liquid balancer** – to complete a diet of forage or one primarily based on straights
- > **Amino acids** – readily available to develop and maintain condition

## DIRECTIONS FOR USE

To be mixed daily with feed:

Bodyweight	Workload	Daily Amount
300 – 600kg*	Hard work / in-foal	60ml
300 – 600kg	Rest / light work	30ml

## SIZES AVAILABLE

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 60ml
Vitamin A	500,000 i.u.	36,000 i.u.
Vitamin D	75,000 i.u.	5,400 i.u.
Vitamin E	14,166mg	1,020mg
Vitamin K3	83mg	6mg
Vitamin B1	833mg	60mg
Vitamin B2	333mg	24mg
Vitamin B6	333mg	24mg
Vitamin B12	1,333µg	96µg
Folic Acid	416mg	30mg
Calcium D-Pantothenate	1,666mg	120mg
Biotin	16.5mg	1.2mg
Choline Chloride	3,333mg	240mg
Niacin	1,000mg	72mg
Trace Elements (source in brackets)	per kg	per 60ml
Iron (Iron (II) Sulphate Heptahydrate)	1,333mg (6,780mg)	96mg (492mg)
Iodine (Potassium Iodide)	16.5mg (22mg)	1.2mg (1.596mg)
Copper (Copper (II) Sulphate Pentahydrate)	1,166mg (4,550mg)	84mg (330mg)
Manganese (Manganous Sulphate Monohydrate)	3,333mg (10,200mg)	240mg (740mg)
Zinc (Zinc Oxide)	4,166mg (5,170mg)	300mg (376mg)
Selenium (Organic Selenium)	5.8mg (2,525mg)	0.42mg (183mg)
Amino Acids	per kg	per 60ml
L-Lysine Monohydrochloride	8,333mg	600mg
DL-Methionine	6,666mg	480mg

Suitable as a primary source of vitamins, minerals & amino acids for horses on a calorie-controlled diet

INCLUDES A 30ML PUMP OR CAP FOR EASY ADMINISTRATION

# FERATONE

Highly effective, short-term support to maximise red blood cell function and combat iron deficiency

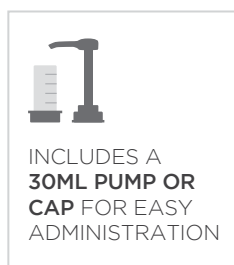

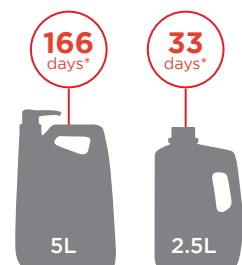

## IDEAL FOR

- > Performance horses
- > Breeding stock
- > Horses recovering from illness or returning from injury

## FEATURES & BENEFITS

- > **Iron & B vitamins** – to aid red blood cell formation, helping to maintain blood volume
- > High concentration of Iron in an easily absorbed and readily available format

## SIZES AVAILABLE

INCLUDES A  
30ML PUMP OR  
CAP FOR EASY  
ADMINISTRATION

## FEEDING DIRECTIONS

To be mixed daily with feed\*\*:

Bodyweight	Type	Daily Amount
450 – 600kg*	Adult / in-foal	30ml
200 – 350kg	Yearlings	30ml
<200kg	Foals	15ml

\*\*Recommended period of use is 2-4 weeks or as directed by your veterinary surgeon.

## NUTRITIONAL ANALYSIS

Vitamins	per litre	per 30ml
Vitamin B1	1,333mg	40mg
Vitamin B2	833mg	25mg
Vitamin B6	500mg	15mg
Vitamin B12	3,333µg	100µg
Folic Acid	500g	15mg
Trace Elements (source in brackets)	per litre	per 30ml
Iron (Iron (11) Sulphate Heptahydrate)	6,000mg (30,000mg)	180mg (900mg)
Copper (Copper (11) Sulphate Pentahydrate)	1,667mg (6,570mg)	50mg (197mg)

Where iron supplementation is recommended, choose **FERATONE**

# COPPERVIT

Chelated minerals, antioxidant and B vitamins combined to support growth and development

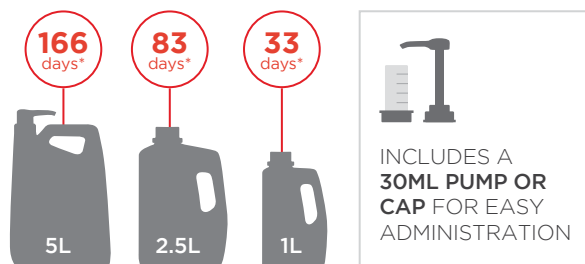

## IDEAL FOR

- > Situations where nutritional deficiencies or imbalances are of concern due to their association with developmental orthopaedic disorders
- > Sales preparation of young horses likely to be experiencing periods of rapid growth
- > Supporting developing joints through periods of vulnerability
- > Continuous supplementation where copper intake is below recommended guidelines\*\*

## FEATURES & BENEFITS

- > **Chelated Copper & Manganese** – vital for healthy skeletal development and support during periods of rapid growth
- > **Vitamin E** – a key antioxidant with multiple functions including immune support and muscle health
- > **Vitamin B12** – promotes red blood cell formation to support overall well-being

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Type	Daily Amount
450 – 600kg*	Adult / in-foal	30ml
200 – 350kg	Yearlings	30ml
<200kg	Foals	15ml

\*\* Prolonged administration of this product should be on veterinary advice only.

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 30ml
Vitamin E	15,250mg	500mg
Biotin	6,100µg	200µg
Vitamin B12	915µg	30µg
Trace Elements (source in brackets)	per kg	per 30ml
Copper (Copper (II) Chelate of Protein Hydrolysates)	6,100mg (50.8g)	200mg (1.67g)
Manganese (Manganese Chelate of Protein Hydrolysates)	3,050mg (20.3g)	100mg (666mg)

Ensure your youngstock are supported in their development with **COPPERVIT**

# COPPER-MAX

Chelated copper and zinc paste for optimal absorption

## IDEAL FOR

All horses, especially those:

- > Not receiving a daily feed
- > Grazing on copper deficient land

## FEATURES & BENEFITS

**Chelated Copper & Zinc** – in their most bioavailable forms ensuring optimal absorption

- > **Chelated Copper** supports:
  - Fertility
  - Bone and connective tissue development
  - Red blood cell production
  - Hoof health
- > **Chelated Zinc** supports:
  - The immune system
  - Skeletal development

## SIZES AVAILABLE

## FEEDING DIRECTIONS

When copper status is unknown, administering twice a year is recommended.

During competition season, 1 syringe every 4-6 weeks.\*\*

Bodyweight	Type	Daily Amount
450 – 600kg*	Adult	Full syringe
200 – 350kg	Yearlings	Half syringe

\*\* Prolonged administration of this product should be on veterinary advice only.

## NUTRITIONAL ANALYSIS

Vitamin	per kg	per 30g
Biotin	66.7mg	2mg
Trace Elements (source in brackets)	per kg	per 30g
Copper (Copper (II) chelate of protein hydrolysates)	16.67g (138.9g)	500mg (4.17g)
Zinc (Zinc chelate of protein hydrolysates)	16.67g (111.1g)	500mg (3.33g)

For convenient copper supplementation, choose **COPPER-MAX**

“

At Wardstown Stud we use COPPER-MAX paste as part of our copper supplementation routine. We find it both easy to use, especially with the mares at grass, and highly effective.

– Mark & Elaine Clarke, Wardstown Stud

”

# B-COMPLETE

B vitamins with added prebiotic to support digestive health and appetite

## IDEAL FOR

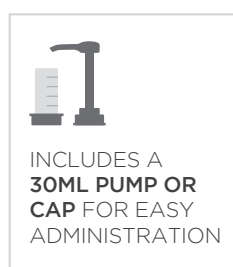

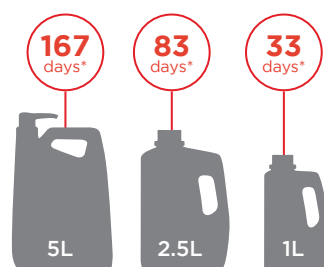

Horses experiencing:

- > Increased stress
- > High energy demands and intense training
- > Fatigue
- > Extensive travelling
- > Reduced appetite

## FEATURES & BENEFITS

- > **Vital B Vitamins**
  - Essential for blood cell formation
  - For optimal metabolism, maximising the diet for energy production
- > **Prebiotic** – to promote the growth of beneficial bacteria to aid digestion and optimise feed utilisation in the hind gut
- > **Vanilla Flavour** – palatable liquid formula, safely promotes appetite

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Type	Daily Amount
450 - 600kg*	Adult / in-foal	30ml
300 - 450kg	Small horse / ponies	15ml
200 - 350kg	Yearlings	30ml

## NUTRITIONAL ANALYSIS

Vitamins	per litre	per 30ml
Vitamin B1	2,000mg	60mg
Vitamin B2	1,666mg	50mg
Vitamin B6	1,000mg	30mg
Vitamin B12	6,666µg	200µg

Ensuring your horse gets the most out of their diet, so you can get the most out of your horse

# PERFORMANCE

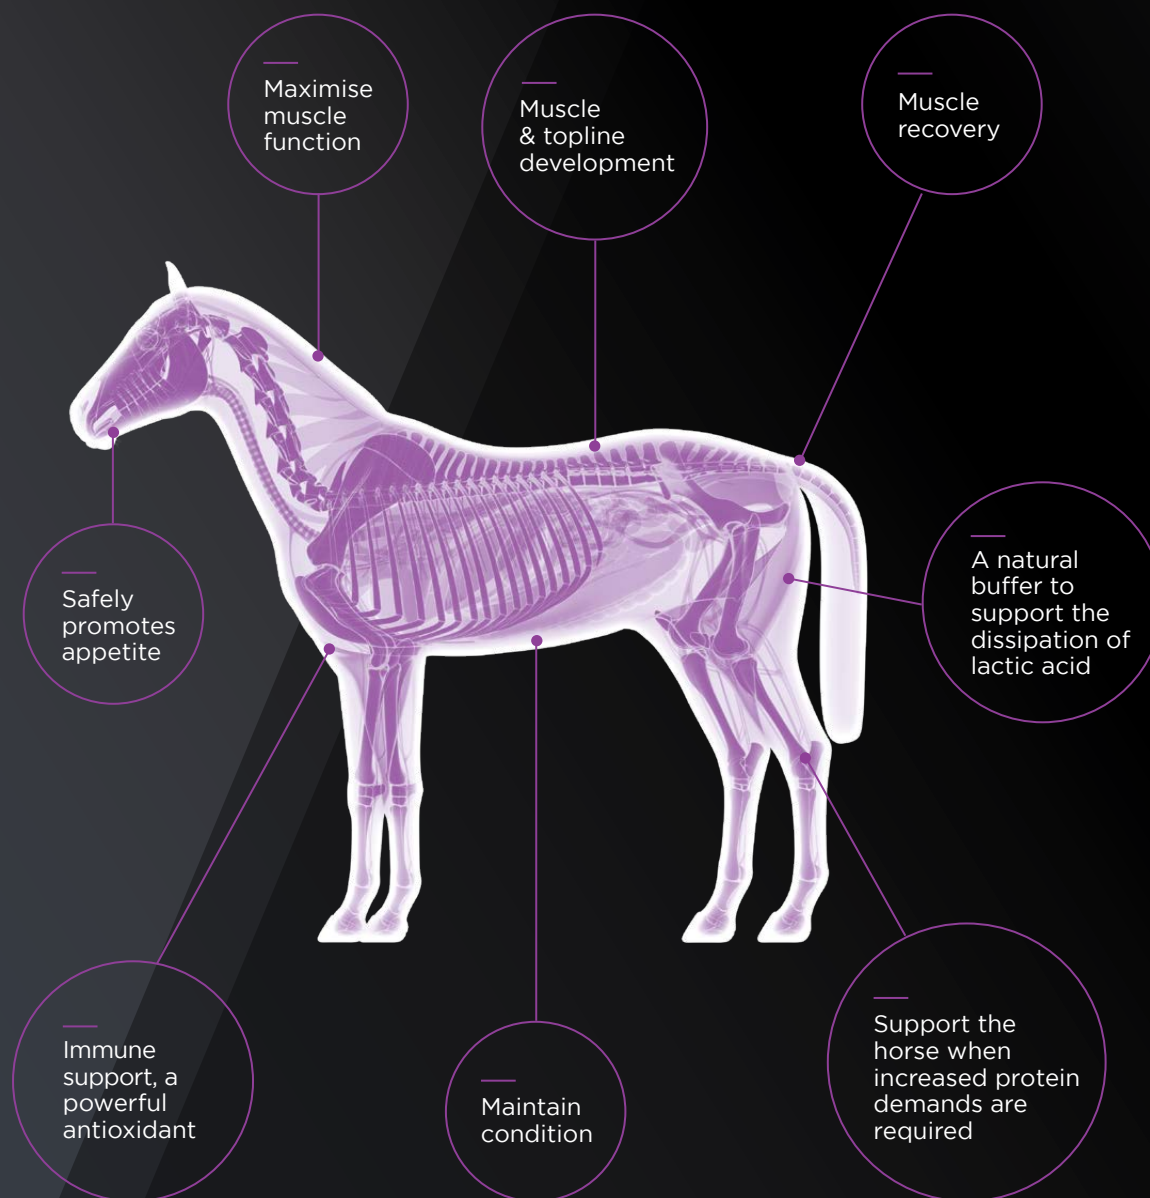

The Foran Equine **PERFORMANCE** range consists of unique and innovative feed supplements providing essential nutrients to support the equine athlete for optimal performance and recovery.

## PROTEIN

- > Protein is an extremely valuable nutrient, made up of chains of amino acids. It is these amino acids, which join together in different combinations, that give protein its varied functions in the body. Protein is particularly important for the performance horse, as it is essential for building strong muscles and maintaining normal function, as well as aiding post-exercise recovery.
- > Our hydrolysed protein products supply your horse with all the essential amino acids, including limiting amino acids and Branched Chain Amino Acids (BCAA's) to optimise your horse's performance, whatever the discipline.

## ANTIOXIDANTS

- > Equal to the importance of protein in post-exercise recovery are antioxidants.
- > Antioxidants provided by the Foran Equine **PERFORMANCE** range can help delay the onset of fatigue and promote a quicker, more effective recovery.

# WHY CHOOSE FORAN EQUINE'S HYDROLYSED PROTEIN?

1

## IT IS UNIQUE

Our high quality hydrolysed protein blend, has been expertly formulated to increase the speed of absorption in the digestive system. It provides a combination of 18 amino acids, including all 10 essential amino acids.

2

## WHAT DOES IT DO?

Hydrolysis enables more efficient absorption of the amino acids resulting in them being readily available in the bloodstream to be utilised in the synthesis of functional proteins, ensuring that key processes such as nutrient transportation and muscle function are not compromised at any time.

3

## WHY IS IT IMPORTANT?

The performance horse has increased protein demands compared to horses at rest, providing a high quality supply of protein is essential to the development, maintenance and repair of muscle. This process is put under significant pressure during exercise, when amino acids must be readily available in adequate supply for optimal muscle function and recovery.

A high quality hydrolysed protein and antioxidant supply will support muscle activity and function, optimise performance during exercise and maximise recovery post-exercise.

4

## BENEFITS TO PERFORMANCE HORSES:

- > Support optimal muscle function during exercise
- > Promote the development, maintenance and repair of muscle tissue
- > Maintain condition
- > Support an efficient and effective recovery period post-exercise

## DID YOU KNOW?

The essential amino acids Leucine, Isoleucine and Valine are known as BCAA's, which constitute 35% of the amino acids found in muscle tissue. Feeding products that supply BCAA's may have beneficial effects on athletic performance, supporting energy levels and promoting muscle repair and recovery.

# PRE-FUEL LIQUID

Support energy and promote recovery daily, through readily absorbed BCAA's

## IDEAL FOR

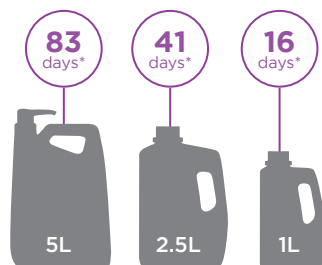

Horses in consistent heavy work and intense training.

- > Racehorses
- > Endurance horses
- > Show Jumpers
- > Eventers
- > Dressage horses

## FEATURES & BENEFITS

- > **Hydrolysed Plant Protein –**
  - Readily absorbed to support the equine athlete throughout an intense training regime
  - Providing essential and non-essential BCAA's to aid recovery
- > Offering flexibility to match the varying needs of your horse's training programme

## SIZES AVAILABLE

INCLUDES A  
30ML PUMP OR  
CAP FOR EASY  
ADMINISTRATION

## FEEDING DIRECTIONS

To be mixed daily with feed. Recommended course 4-8 weeks.

Bodyweight	Type	Daily Amount
500 – 600kg*	Adult horse	100ml
<500kg	Adult horse	60ml

## NUTRITIONAL ANALYSIS

Key Ingredient	per litre	per 100ml
Hydrolysed Plant Protein	389g	38.9mg

To maintain performance, stamina and power, choose **PRE-FUEL LIQUID**

## PRE-FUEL GEL

Rapid energy paste with essential BCAA's to maximise athletic performance

**IDEAL FOR**

All performance horses:

- > Who tire easily during competition
- > When significant athletic effort is required in one day

## FEATURES & BENEFITS

- > **Hydrolysed Plant Protein** –
  - Readily absorbed to provide extra support for the equine athlete when needed most
  - Providing essential and non-essential BCAA's to support maximum effort
- > **Vitamin E** – a powerful antioxidant for muscle health
- > **B Vitamins** – for optimum energy and protein utilisation
- > **Key Minerals** – to support muscle function

## SIZES AVAILABLE

## FEEDING DIRECTIONS

Can be given prior to exercise / racing. Give 1-2 hours prior to exertion.

Type	Daily Amount
Adult horse*	Full syringe

## NUTRITIONAL ANALYSIS

Vitamins	per litre	per 60ml
Vitamin E	41,650mg	2,500mg
Vitamin B1	2,665mg	160mg
Vitamin B2	3,332mg	200mg
Vitamin B6	500mg	30mg
Vitamin B12	12,495µg	750µg
Niacin	5,000mg	300mg
Calcium-D-Pantothenate	1,666mg	100mg
Choline Chloride	2,500mg	150mg
Trace Element (source in brackets)	per litre	per 60ml
Zinc (Zinc chelate of protein hydrolysates)	333mg (2,216mg)	20mg (133mg)

Quick use  
energy boost

# MUSCLE PREP

Optimise muscle development and topline condition utilising readily absorbed protein

## IDEAL FOR

Horses with a need for rapid muscle and topline development, such as:

- > Sales preparation
- > Show horses
- > Performance horses

## FEATURES & BENEFITS

- > **Hydrolysed Plant Protein** – readily available amino acids for rapid muscle development
- > **Vitamin E** – a powerful antioxidant to support muscle recovery
- > **B Vitamins** – for optimum protein and energy utilisation

## SIZES AVAILABLE

INCLUDES A  
**30ML PUMP OR  
CAP** FOR EASY  
ADMINISTRATION

## FEEDING DIRECTIONS

To be mixed daily with feed. Shake well before use. For best results give daily for 2-6 weeks before sale.\*\*

Bodyweight	Type	Daily Amount
>500kg*	Adult horse	120ml
300 – 500kg	Yearling / 3 year old	90ml
200 – 300kg	Foal	30ml

\*\*The amount of Muscle Prep can be increased according to veterinary or nutritionist advice.

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 100ml
Vitamin E	4,167mg	500mg
Vitamin B1	667mg	80mg
Vitamin B2	833mg	100mg
Vitamin B6	333g	40mg
Vitamin B12	1,667µg	200µg

To build muscle and improve topline choose **MUSCLE PREP**

# MUSCLE MAX

Maximise muscle function, health and recovery with antioxidants

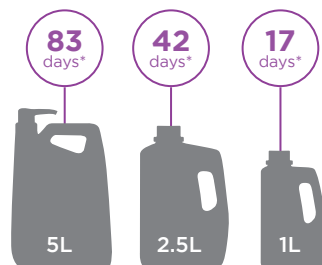

## IDEAL FOR

- > Horses that require extra support to maintain topline
- > Performance horses with challenging training schedules
- > When a quick recovery from work is desirable
- > Those who suffer from muscle conditions including stiffness

## FEATURES & BENEFITS

- > **Vitamin E** – a powerful antioxidant to support muscle recovery
- > **Selenium** – works in conjunction with Vitamin E for maximum benefit
- > **L-Lysine** – a key amino acid for muscle development and to promote muscle recovery
- > **B Vitamins** – for optimum energy and protein utilisation
- > **Vanilla Flavour** – extremely palatable for the fussy feeder

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed. Shake well before use.

Bodyweight	Type	Daily Amount
300 – 600kg*	Mares, stallions, racing, jumping, polo	60ml
200 – 300kg	Yearlings	30ml

## NUTRITIONAL ANALYSIS

Vitamins	per litre	per 60ml
Vitamin E	45,000mg	2,700mg
Vitamin B1	300mg	18mg
Vitamin B2	150mg	9mg
Vitamin B6	300mg	18mg
Vitamin B12	4mg	240µg
Trace Element (source in brackets)	per litre	per 60ml
Selenium (Sodium Selenite)	10mg (23mg)	0.6mg (1.38mg)
Amino Acid	per litre	per 60ml
L-Lysine Monohydrochloride	70g	4.2g

Maintain muscle health with **MUSCLE MAX**

# NEUTROLAC

To neutralise lactic acid

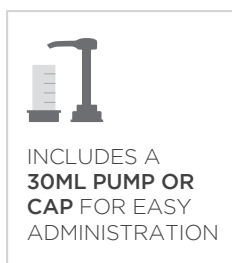

## IDEAL FOR

- > Performance horses

## FEATURES & BENEFITS

- > **Sodium Acid Citrate** – to neutralise acid build up during strenuous work
- > Prolongs maintenance of the favourable acid-base balance in the muscles, delaying the onset of fatigue

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Daily Amount
300 – 600kg*	30ml

## NUTRITIONAL ANALYSIS

Key Ingredient	per litre	per 30ml
Sodium Acid Citrate	280g	8,400mg

# PRE-FUEL + REFUEL

THE ULTIMATE PERFORMANCE  
& RECOVERY COMBO FOR  
COMPETITION

**NEW  
COMBO**

### **QUICK USE ENERGY BOOST**

Maximise athletic performance with essential BCAA'S plus key vitamins and minerals

**PERFORMANCE**

### **REFUEL YOUR HORSE FOR OPTIMUM RECOVERY**

with essential electrolytes, added vitamins and antioxidants

**ELECTROLYTES**

# ELECTROLYTES /

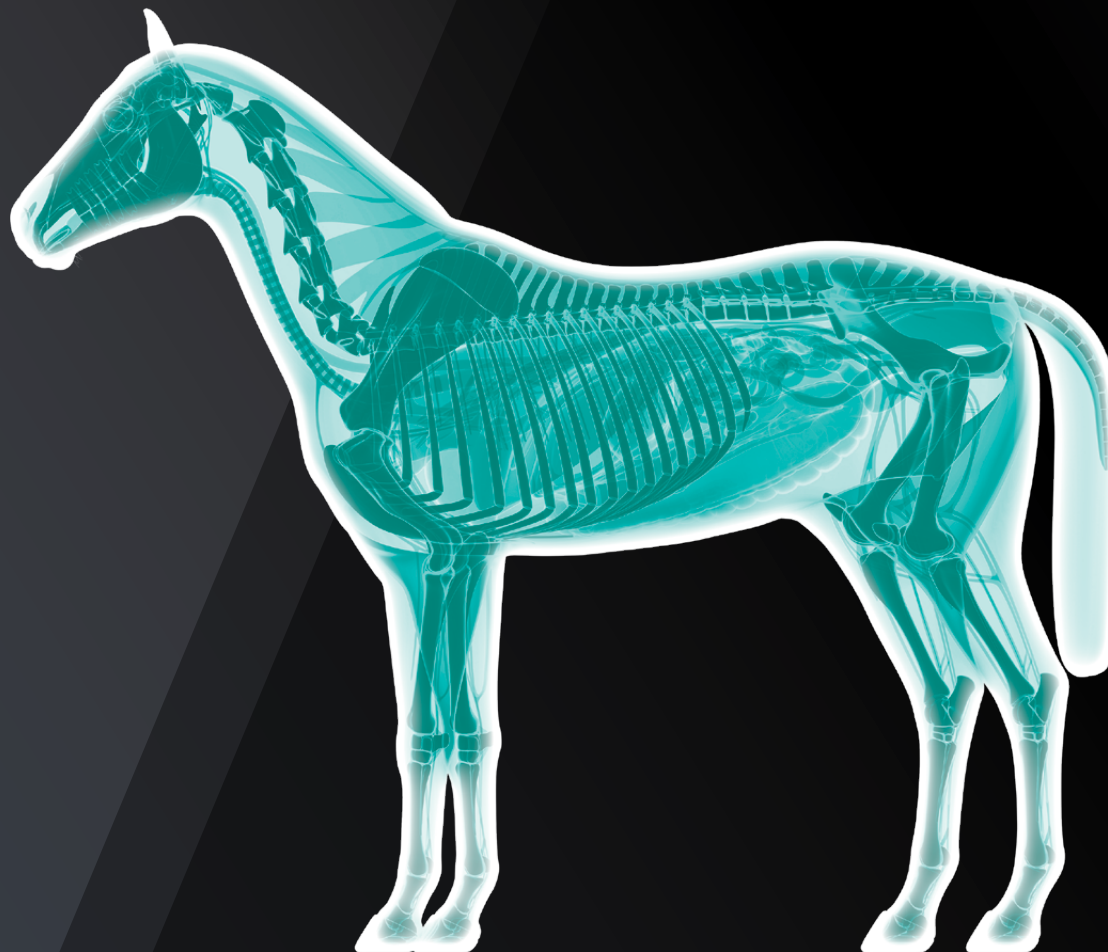

Electrolytes or “salts” are a mix of essential minerals present in the blood and tissues of horses. These electrolytes have many functions, primarily maintaining water balance and blood volume in the body. They also function in muscle contraction, nerve conduction as well as being integral to kidney and liver functions.

Horses lose electrolytes in their sweat. As strenuous exercise can produce significant levels of sweat, the electrolyte loss can be substantial.

In order to maintain the body’s water balance it is essential to replace these lost electrolytes along with water.

Adequate provision of electrolytes in a horse’s diet maintains hydration, appetite, improves exercise endurance and recovery after strenuous exercise.

- > **ESSENTIAL RECOVERY**
- > **IDEAL CONCENTRATION**
- > **INTEGRATED ANTIOXIDANTS**
- > **REFUEL ENERGY**
- > **PROMOTE RE-HYDRATION**

# EQUI-LYTE G

The ultimate package of balanced electrolytes and antioxidants to support muscle function and recovery

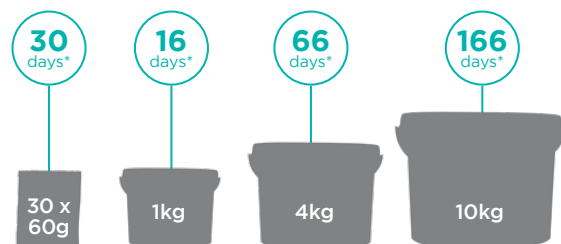

## IDEAL FOR

- > All performance horses
- > Horses in intense work
- > Those who suffer from muscle conditions including stiffness
- > All horses in hot climates

## FEATURES & BENEFITS

- > **Specially designed** – to manage the loss of electrolytes through sweating
- > **Sodium** – the most important electrolyte as it regulates thirst
  - Complemented by potassium, chloride, magnesium and calcium to support whole body function
- > **Ainseed Flavour** – palatable to encourage consumption
- > **Vitamin C & E** – a powerful antioxidant package to aid muscle recovery and maintain a healthy immune system

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Type	Daily Amount
450 – 600kg*	Hard work	60g
300 – 450kg	Hard work	45g
450 – 600kg	Light work	30g

## NUTRITIONAL ANALYSIS

Vitamins	per kg
Vitamin E	8,333mg
Vitamin C	18,400mg

Water should always be freely available once electrolytes are given to facilitate rehydration

Optimise rehydration and recovery with **EQUI-LYTE G**. More than just an electrolyte

# REFUEL LIQUID

Daily balanced electrolyte with added B vitamins for optimal recovery

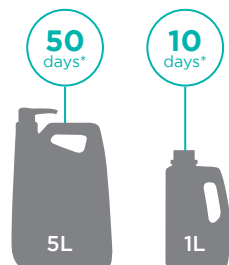

## IDEAL FOR

- > Performance horses
- > Horses in intense work
- > Horses in hot climates

## FEATURES & BENEFITS

- > **Specially designed** – to manage the loss of electrolytes through sweating
- > **Sodium** – the most important electrolyte as it regulates thirst
  - Complemented by potassium, chloride, magnesium and calcium to support whole body function
- > **B Vitamins** – for optimum protein and energy utilisation and to maintain appetite
- > **Palatable liquid formulation** – offering flexibility for administration

## SIZES AVAILABLE

INCLUDES A  
30ML PUMP OR  
CAP FOR EASY  
ADMINISTRATION

## FEEDING DIRECTIONS

To be mixed with water. Recommended for use after exercise or competition.

Bodyweight	Daily Amount
450 – 600kg*	100ml
300 – 450kg	75ml

## NUTRITIONAL ANALYSIS

Vitamins	per litre	per 100ml
Vitamin B1	770mg	77mg
Vitamin B6	260mg	26mg
Vitamin B12	1,000µg	100µg

Water should always be freely available once electrolytes are given to facilitate rehydration

**REFUEL LIQUID**  
gets your horse  
back to their best  
after exercise

# REFUEL GEL

Concentrated electrolyte gel with added B vitamins and antioxidants for optimum recovery

## IDEAL FOR

- > Performance horses
- > Horses in intense work
- > Horses in hot climates
- > Those who suffer from muscle conditions including stiffness

## FEATURES & BENEFITS

- > **Specially designed** – to manage the loss of electrolytes through sweating
- > **Sodium** – the most important electrolyte as it regulates thirst
  - Complemented by potassium, chloride, magnesium and calcium to support whole body function
- > **B Vitamins** – for optimum protein and energy utilisation and to maintain appetite
- > **Vitamin C & E** – a powerful antioxidant package to aid muscle recovery

## SIZES AVAILABLE

## FEEDING DIRECTIONS

Give 1 hour post-exercise when the horse is fully cooled down.

Bodyweight	Daily Amount
450 – 600kg*	Full syringe
300 – 450kg	Half syringe

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 30ml
Vitamin E	13,880mg	587mg
Vitamin B1	543mg	23mg
Vitamin B6	189mg	8mg
Vitamin B12	2,127µg	90µg
Vitamin C	11,820mg	500mg

Water should always be freely available once electrolytes are given to facilitate rehydration

**REFUEL** your horse for recovery with essential electrolytes in an easy to administer syringe

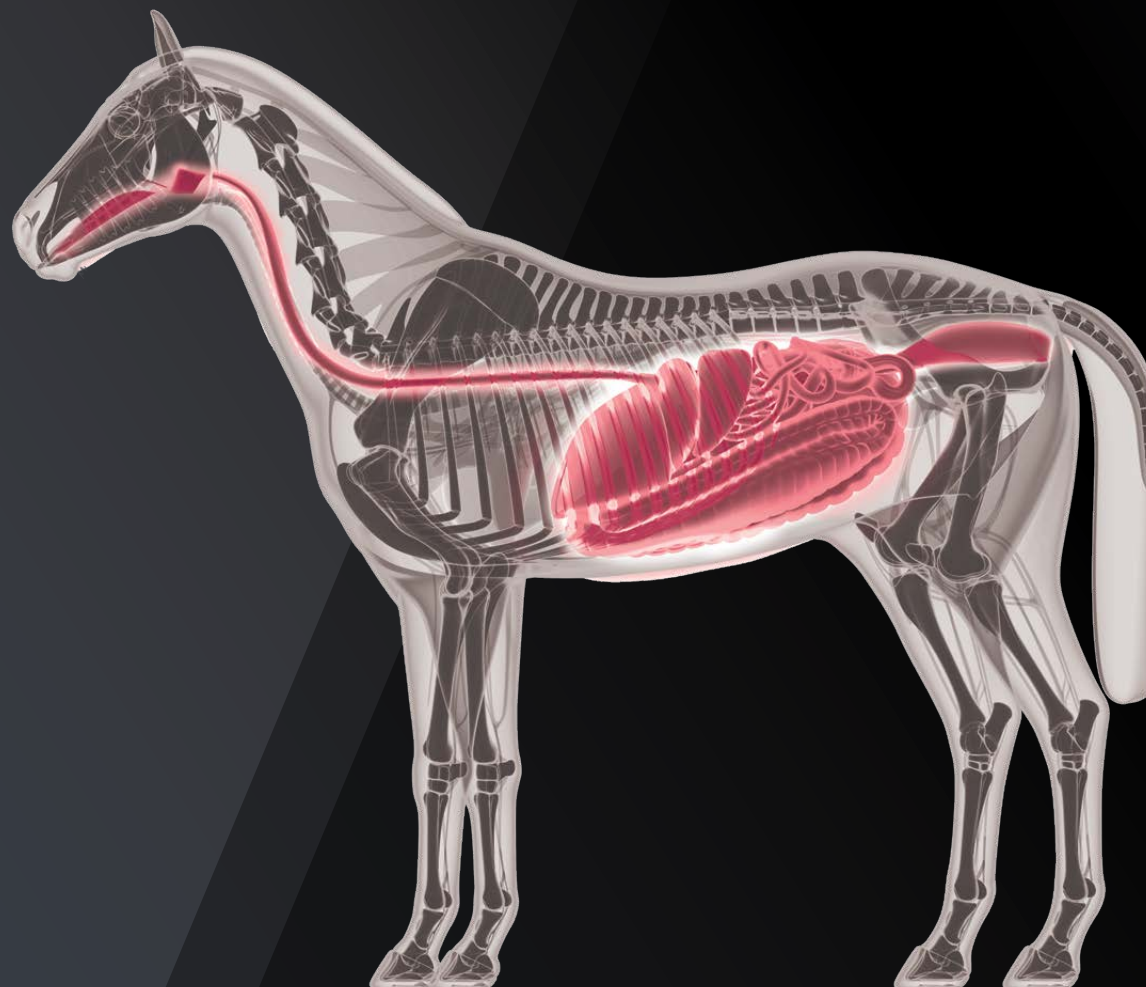

# DIGESTION /

Horses have a uniquely complex digestive system. Domesticated horse care has radically altered the equine diet from the normal of ad libitum forage to stable confinement with periodic concentrate feeding and limited forage.

With these changes of husbandry has come a propensity towards various digestive upsets.

Maintenance of digestive health is therefore essential to optimise nutrient uptake and utilisation from the diet.

- > NUTRIENT ABSORPTION
- > PROMOTE HEALTHY GUT
- > AID DIGESTIVE PROCESS
- > NOURISH MUCOSAL LINING
- > SUPPORT PERFORMANCE

# KENTUCKY KARRON OIL

Superior quality readily absorbed Omega 3 & 6 to support digestive function and overall well-being

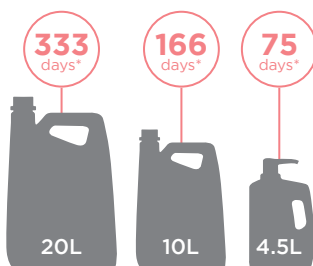

## IDEAL FOR

- > Horses with dry skin and dull coat
- > Horses requiring a concentrated source of energy where feed intake is limited
- > Mares and stallions requiring fertility support
- > Horses in their advancing years

## FEATURES & BENEFITS

- > Balanced ratio of **Essential Fatty Acids** to support:
  - Digestive function
  - The immune system
  - Skin and coat condition
  - Fertility
  - Joint health
- > Fortified with **Calcium Hydroxide** to improve digestibility

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Daily Amount
450 - 600kg*	60ml
300 - 450kg	45ml
200 - 300kg	45ml
Foals	30ml

## NUTRITIONAL ANALYSIS

Emulsified Flaxseed Oil providing	per litre	per 60ml
Omega 3	275g	17g
Omega 6	69g	4g

Gold standard omega oil, for shining condition

# NUTRI-GARD EXTRA

Gastric health support through an enhanced prebiotic, highly digestible fibres and B vitamins to promote appetite

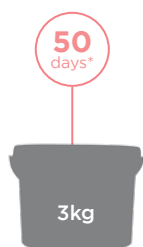

## IDEAL FOR

- > Horses that require digestive support to maintain condition and appetite
- > Those on a low forage diet

## FEATURES & BENEFITS

- > **Prebiotic** – to promote the growth of beneficial bacteria to aid digestion and optimise feed utilisation in the hind gut
- > Effective combination of **B vitamins** to:
  - Promote appetite
  - Optimise protein and energy utilisation
- > **Digestible fibre** – promoting gastric health
- > **Essential amino acids** – which function as a buffer and help to maintain condition
- > **Apple Flavour** – ensuring palatability

## SIZES AVAILABLE

## FEEDING DIRECTIONS

Can be fed dry or mixed with water.

Bodyweight	Daily Amount
450 – 600kg*	60g + 400ml
300 – 450kg	45g + 300ml
200 – 300kg	30g + 200ml
<200kg	20g + 150ml

## NUTRITIONAL ANALYSIS

Vitamins	per kg
Choline Chloride	6.03g
Vitamin B1	866mg
Vitamin B6	402mg
Vitamin B2	400mg
Folic Acid	200mg
Vitamin B12	3.6mg
Amino Acids	per kg
L-Threonine	55.6g
DL-Methionine	22.2g

Care for your horse from the inside out with the digestive health benefits of **NUTRI-GARD EXTRA**

# ATTA-SORB

Effective natural binding agents with added electrolytes for use during digestive upset

## IDEAL FOR

- > Foals during periods of digestive upset

## FEATURES & BENEFITS

- > **Attapulgites** – to protect the natural healthy bacteria flora of the gut
- > **Sodium, Potassium & Chloride** – electrolytes to maintain fluid balance
- > **Pectin** – absorbent binding agent to help firm droppings

## SIZES AVAILABLE

## FEEDING DIRECTIONS

Type	Daily Amount
Foals <200kg*	10ml twice daily

## NUTRITIONAL ANALYSIS

	per litre	Per 60ml syringe
Sodium	15,700mg	960mg
Potassium	13,600mg	816mg
Chloride	36,700mg	2,202mg

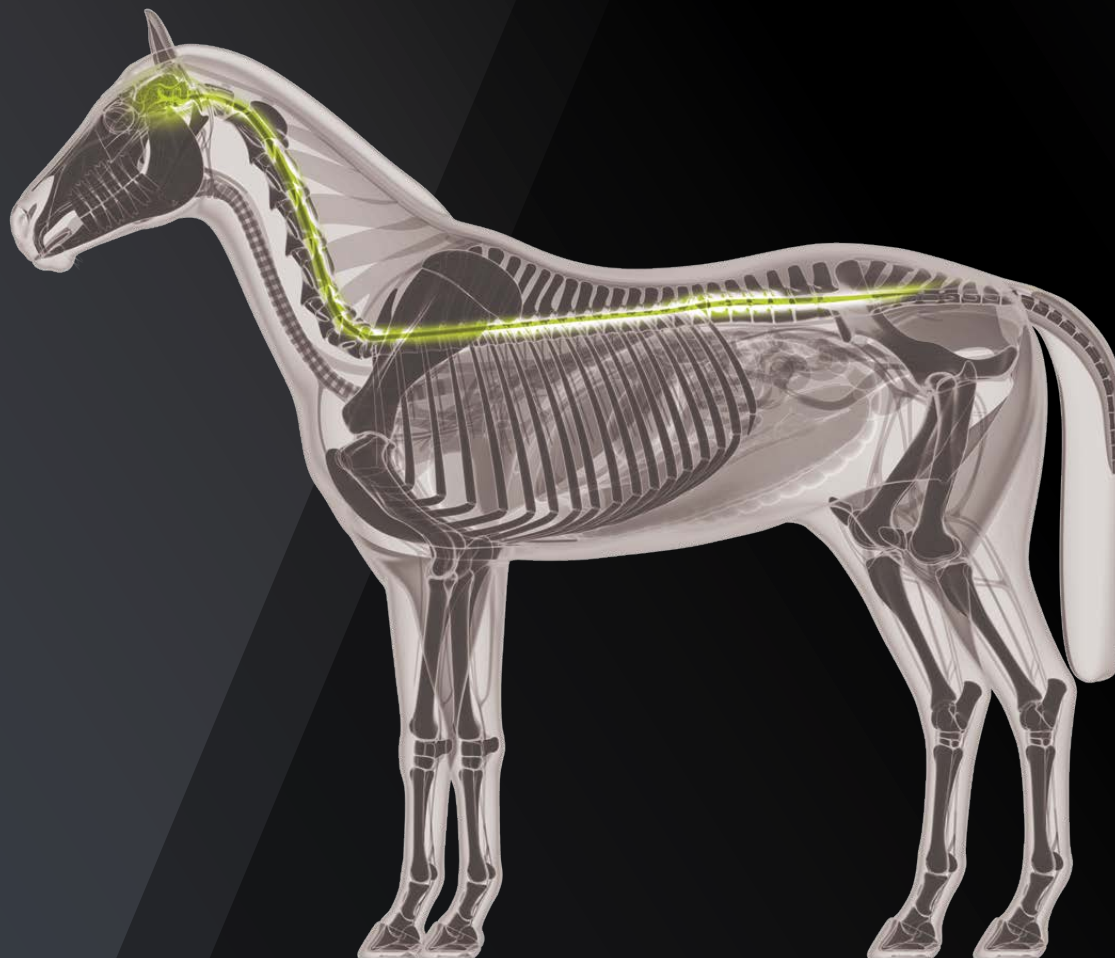

# CALMING /

Modern horse husbandry is often far removed from a horse's natural environment. This along with athletic training, competition demands and high starch and sugar diets can all lead to over-excitability in some horses. This nervous tension can negatively affect performance or trainability of a horse.

Some horses get stressed by particular situations, such as clipping, shoeing or travelling. In some of these cases, the ability to naturally calm the animal can benefit performance, riding temperament and handling of the horse.

- > MAINTAIN RELAXED CONDITION
- > OPTIMISE PERFORMANCE
- > BALANCE BEHAVIOUR
- > SUPPORT HEALTHY APPETITE
- > NATURAL CALMING

# NUTRI-CALM

For daily focus and concentrated performance.

## IDEAL FOR

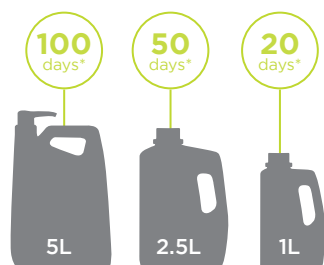

Horses:

- > Needing support to cope with their environment, promoting daily focus
- > That require support to concentrate during work
- > On box-rest, returning to work following injury or on reduced turnout

## FEATURES & BENEFITS

- > **L-Tryptophan** – an essential amino acid and precursor to Serotonin
- > **Serotonin** – a neurotransmitter associated with inhibition of fear and stress
- > **B-Complex Vitamins** – an effective combination to support the nervous system
- > **Magnesium** – a key mineral for muscle and nerve function

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Daily Amount
450 – 600kg*	50ml
300 – 450kg	25ml

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 30g
Vitamin B1	2,479mg	150mg
Vitamin B6	826mg	50mg
Vitamin B12	2,149µg	130µg
Niacin	1,653mg	100mg
Amino Acid	per kg	per 30g
L-Tryptophan	33,058mg	2,000mg

Promote focus and concentration in your horse for optimal training and performance

# NUTRI-CALM GEL

For focus and concentrated performance when needed most

## IDEAL FOR

Horses:

- > Needing support to cope with their environment during competition
- > Needing help to cope with stressful situations such as:
  - Travelling
  - Changing environment

## FEATURES & BENEFITS

- > **L-Tryptophan** – an essential amino acid and precursor to Serotonin
- > **Serotonin** – a neurotransmitter associated with inhibition of fear and stress
- > **B-Complex Vitamins** – an effective combination to support the nervous system
- > **Magnesium** – a key mineral for muscle and nerve function

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be given 1-2 hours before a stress induced event.

Bodyweight	Daily Amount
450 – 600kg*	Full syringe
300 – 450kg	Half syringe

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 60ml
Vitamin B1	2,400mg	180mg
Vitamin B6	800mg	60mg
Vitamin B12	2,080µg	156µg
Niacin	1,600mg	120mg
Amino Acid	per kg	per 60ml
L-Tryptophan	32,000mg	2,400mg

When convenient focus and concentration is needed, choose **NUTRI-CALM GEL**

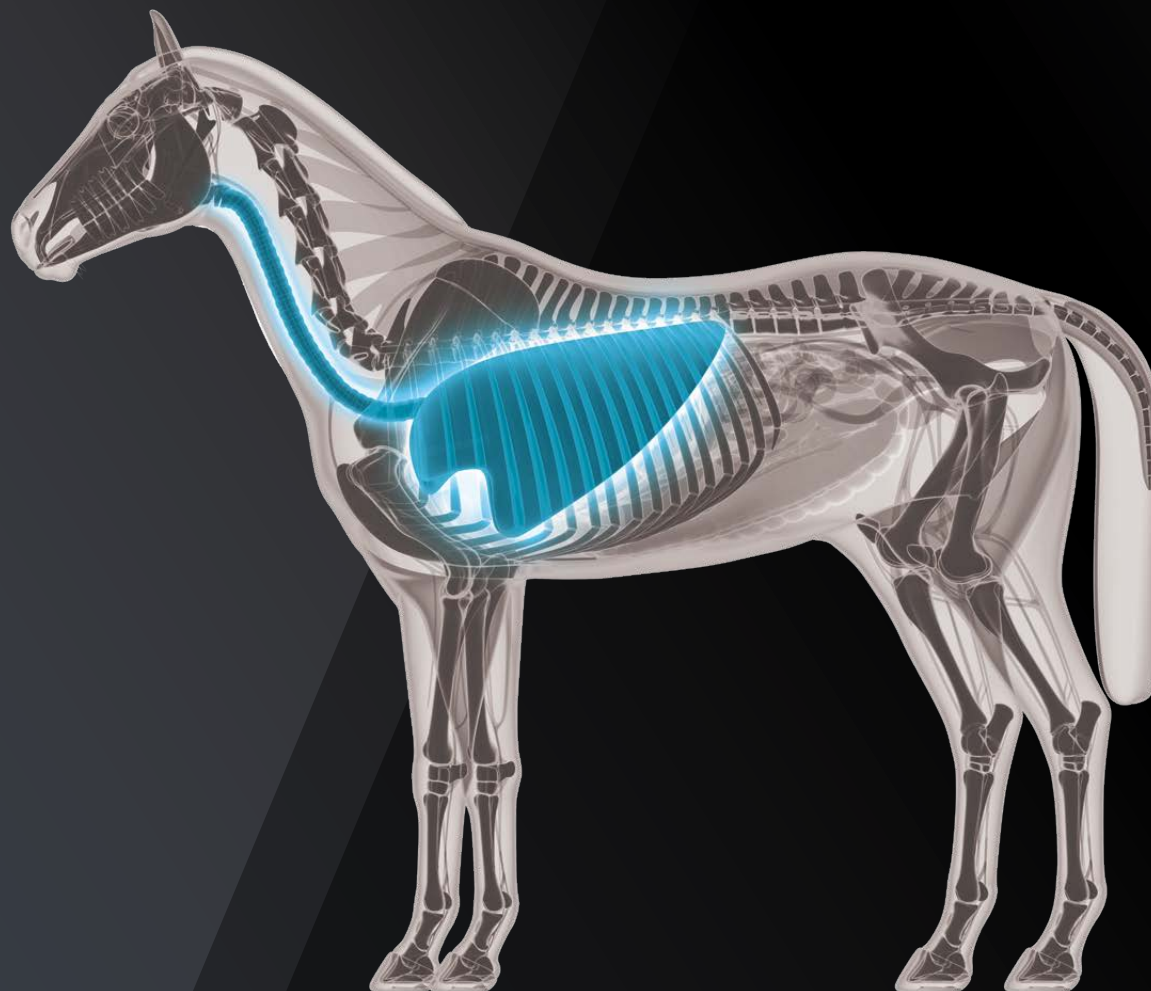

# RESPIRATION /

All physical activity occurs due to muscle contraction, in order to contract, muscles require oxygen. The equine airways function to bring oxygen into the body and expel carbon dioxide.

As a galloping horse inhales with every stride and requires 30-37L of air per second, it is vital to maintain and maximise airway function in order to reach full athletic potential.

- > MAXIMISE AIR POWER
- > CLEAR AIRWAYS
- > ANTIOXIDANT
- > SUPPORT BLOOD VESSELS

# AIRVENT

Vapour releasing syrup to open the airways, rich in vitamin C and essential oils for optimal air flow

## IDEAL FOR

- > Youngstock
- > Horses in pre-training
- > Horses and ponies sensitive to dust, mould and pollen
- > Horses in an intensive indoor environment, such as large stable blocks
- > Horses with challenged or compromised immune system

## FEATURES & BENEFITS

- > **Vitamin C** – a powerful antioxidant to maintain a healthy immune system
- > **Honey** – a natural soothing agent
- > **Peppermint & Eucalyptus** – aromatic oils combined to open up the airways

## SIZES AVAILABLE

50 days\*

2.5L

20 days\*

1L

INCLUDES A  
30ML PUMP OR  
CAP FOR EASY  
ADMINISTRATION

## FEEDING DIRECTIONS

Give orally as required.

Bodyweight	Daily Amount
>300kg*	50ml
<300kg	25ml

## NUTRITIONAL ANALYSIS

Additives	per kg	per 50ml
Vitamin C	16,500mg	825 mg

Vitamin C is an essential support for the respiratory system

# AIRVENT GEL

Vapour releasing gel to open the airways, when optimal air flow is needed most

## IDEAL FOR

- > Youngstock
- > Horses in pre-training
- > Horses and ponies sensitive to dust, mould and pollen
- > Horses in an intensive indoor environment, such as large stable blocks
- > Horses with challenged or compromised immune system

## FEATURES & BENEFITS

- > **Vitamin C** – a powerful antioxidant to maintain a healthy immune system
- > **Honey** – a natural soothing agent
- > **Peppermint & Eucalyptus** – aromatic oils combined to open up the airways

## SIZES AVAILABLE

## FEEDING DIRECTIONS

Bodyweight	Daily Amount
>300kg*	Full syringe
<300kg	Half syringe

## NUTRITIONAL ANALYSIS

Additives	per kg	per 50ml
Vitamin C	16,500mg	825 mg

Instant and effective respiratory support

# HONEY C

Rich in vitamin C to support immunity and soothe the airway

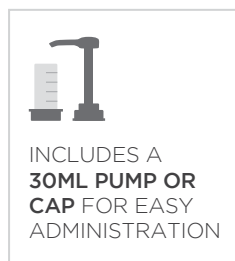

## IDEAL FOR

- > Supporting respiratory health whilst traveling
- > Horses with a challenged or compromised immune system
- > Horses whose own production of Vitamin C may be compromised

## FEATURES & BENEFITS

- > **Honey** – a natural soothing agent
- > **Vitamin C** – an antioxidant to support a healthy immune system
- > **Thyme, Liquorice & Horehound** – herbal promoters of respiratory health

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be administered orally, 3 times a day.

Bodyweight	Daily Amount
>450kg*	60ml
250 – 450kg	45ml
<250kg	30ml

## NUTRITIONAL ANALYSIS

Vitamin	per kg	per 60ml
Vitamin C	15,000mg	1,080mg

Soothing  
immune  
support when  
needed most

# ZOSFOR

Antioxidant rich respiratory support with added vitamin K

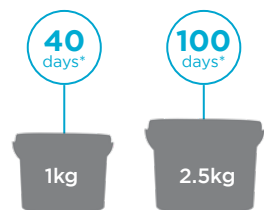

## IDEAL FOR

- > All horses in high intensity training and competition
- > Supporting horses with a compromised immune system

## FEATURES & BENEFITS

- > A powerful combination of antioxidants to help combat the effects of oxidative stress on the respiratory system:
  - **Hesperidin** – a natural super antioxidant bioflavonoid to support capillary health
  - **Vitamin C & E** – working in harmony to maintain a healthy immune system
- > **Vitamin K** – essential for blood clotting

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Workload	Amount for initial 10 days	Amount for further 80 days
400 – 600kg	Hard Work	50g	25g*

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 25g
Vitamin C	2,000mg	5mg
Vitamin K3	200mg	5mg

Your all-in-one ultimate respiratory health support

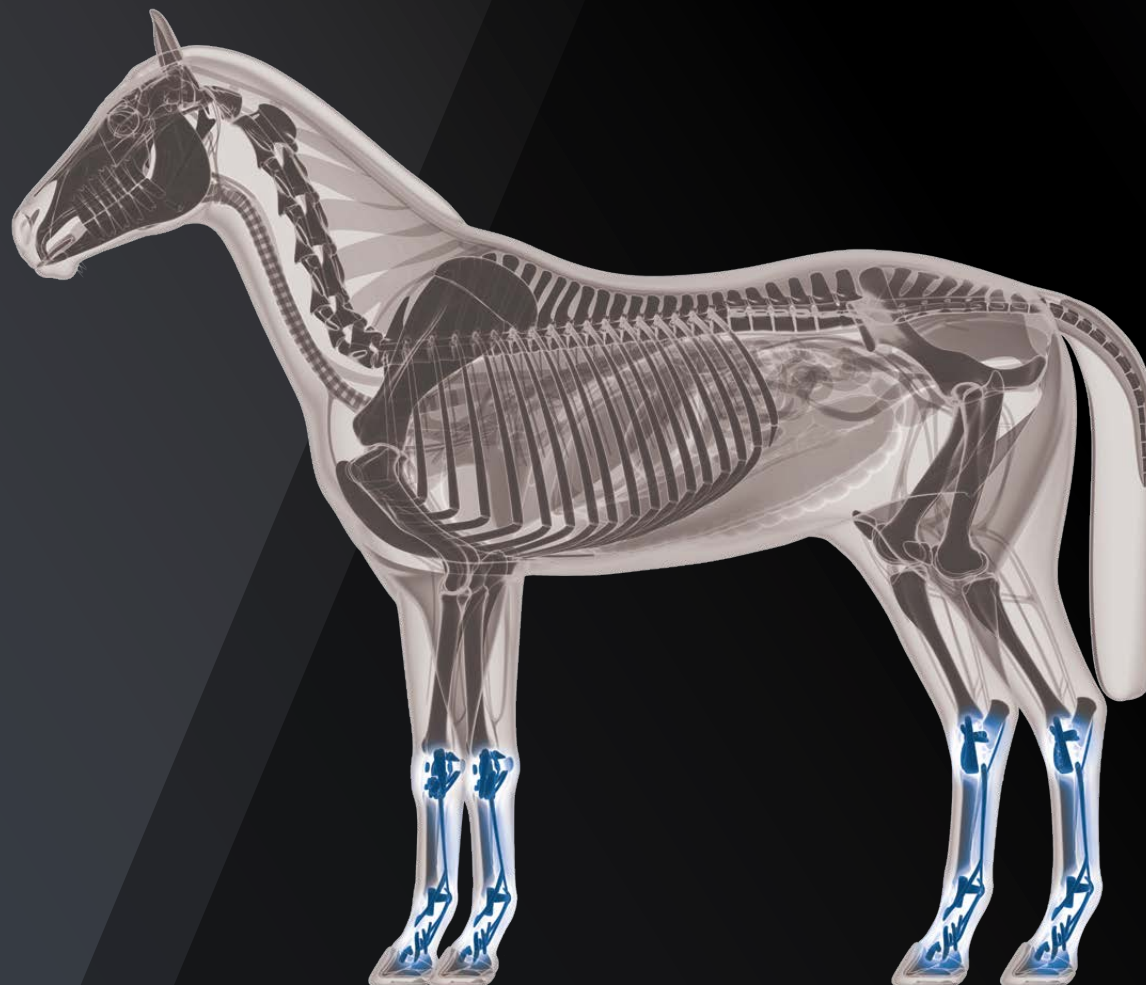

# JOINTS & MOBILITY

Joint health is essential for equine athletes. Strong, stable joints are needed to maximise performance ability.

A busy competition schedule can place high demands on the equine joint. Maintaining joint health through supplementation not only supports performance, it also can prolong the athletic life of the horse.

Joints are flexible structures where two bones meet that allow movement. The bone ends are covered by joint or articular cartilage, which is both strong and cushioning to ease movement and protect the bones. The joint space is filled with synovial fluid, which acts as a lubricant for smooth joint movement.

- > **NOURISH JOINTS**
- > **PROMOTE SOUNDNESS**
- > **BUILD STRONG BONES**
- > **MAINTAIN MOBILITY**
- > **SUPPORT SKELETAL SYSTEM**

# OSTEO-GLYCAN

Superior powdered supplement containing marine collagen, vitamins and minerals to support bone and joint development

## IDEAL FOR

- > Youngstock
- > Young horses entering training with increased physical demands

## FEATURES & BENEFITS

- > **Marine Collagen plus 5 key minerals** – to promote bone and joint development
- > **Calcium & Phosphorus** – in the ideal ratio to support bone growth and development
- > **Vitamin A** – to support collagen formation
- > **Vitamin D3** – to enhance calcium absorption

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Type	Daily Amount
200 – 350kg*	Yearlings	30g
<200	Foals	25g

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 50g
Vitamin A	600,00 I.U.	30,000 I.U.
Vitamin D3	120,000 I.U.	6,000 I.U.
Amino Acid	per kg	per 50g
Copper (Cupric Chelate of Amino Acids Hydrate)	1,000mg (8.33g)	50mg (416.5mg)
Zinc (Zinc Chelate of Amino Acids Hydrate)	3,000mg (20g)	150mg (1g)

# OST-O-FLEX

An effective, optimal combination of nutrients to support total mobility and joint function

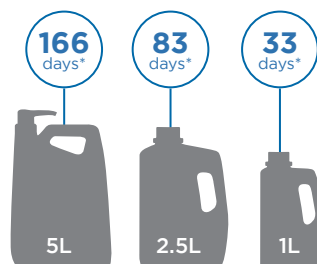

## IDEAL FOR

Performance Horses

## FEATURES & BENEFITS

- > **Glucosamine** – a key component of cartilage
- > **MSM** – promotes joint and ligament health
- > **Marine Collagen** – as a source of calcium, chondroitin sulphate and hyaluronic acid

## SIZES AVAILABLE

## FEEDING DIRECTIONS

Give twice per day for the first 10 days, then give once per day as a maintenance amount. To be mixed daily with feed:

Bodyweight	Daily Amount
450 – 600kg*	30ml
300 – 450kg	15ml

## NUTRITIONAL ANALYSIS

Additives	per litre	per 30ml
Manganese (Manganous sulphate monohydrate)	3,200mg (10,000mg)	96mg (300g)

# HOOF CARE /

Hoof health is essential to all equines with hoof health being a reflection of the overall health of the horse. The hoof is an actively growing tissue, which is constantly sloughed and growing between 6-10mm per month. Many vitamins and minerals are necessary for hoof horn production.

- > PROMOTE HOOF GROWTH
- > AID REPAIR & REGENERATION
- > SPECIALIST HOOF NUTRITION
- > IMPROVE ELASTICITY
- > TOTAL STRUCTURAL SUPPORT

# HOOF AID

Support hoof growth and strength through a combination of Biotin and key minerals

## IDEAL FOR

- > Horses with hoof problems such as:
  - Poor quality horn growth
  - Cracking
  - Brittleness
  - Slow growth and white crumbly horn
- > Horses with long periods of turnout on challenging ground conditions

## FEATURES & BENEFITS

- > **Biotin & Methionine** – maximising hoof strength and quality by:
  - Supporting the connective tissues inside the hoof wall
  - Promoting optimal horn growth
- > **Copper & Zinc** – important for keratin synthesis associated with hoof strength and the ability to withstand loading

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Daily Amount
450 – 600kg*	20g / 45ml
300 – 450kg	12.5g / 30ml
200 – 350kg	12.5g / 30ml
<200kg	6g / 15ml

LIQUIDS INCLUDE A 30ML PUMP OR CAP FOR EASY ADMINISTRATION, WHILE POWDERS INCLUDE A SCOOP.

## POWDER NUTRITIONAL ANALYSIS

Vitamin	per kg	per 12.5g
Biotin	1,600mg	20mg
Trace Element (source in brackets)	per kg	per 12.5g
Zinc (Zinc Oxide)	16,000mg (20,500mg)	200mg (256mg)
Amino Acid	per kg	per 12.5g
DL-Methionine	100mg	1.25mg

## LIQUID NUTRITIONAL ANALYSIS

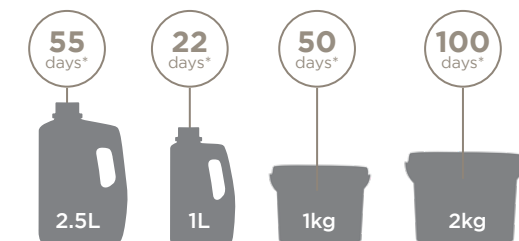

Vitamin	per kg	per 30ml
Biotin	480mg	17.5mg
Calcium D-Pantothenate	1,370mg	50mg
Trace Element (source in brackets)	per kg	per 30ml
Copper (Cupric Sulphate Pentahydrate)	205mg (819mg)	7.48mg (30mg)
Zinc (Zinc Oxide)	2,740mg (3,513mg)	100mg (128mg)
Amino Acid	per kg	per 30ml
DL-Methionine	30,200mg	1,100mg

A combination of elevated nutrients for optimum hoof quality

## SIZES AVAILABLE

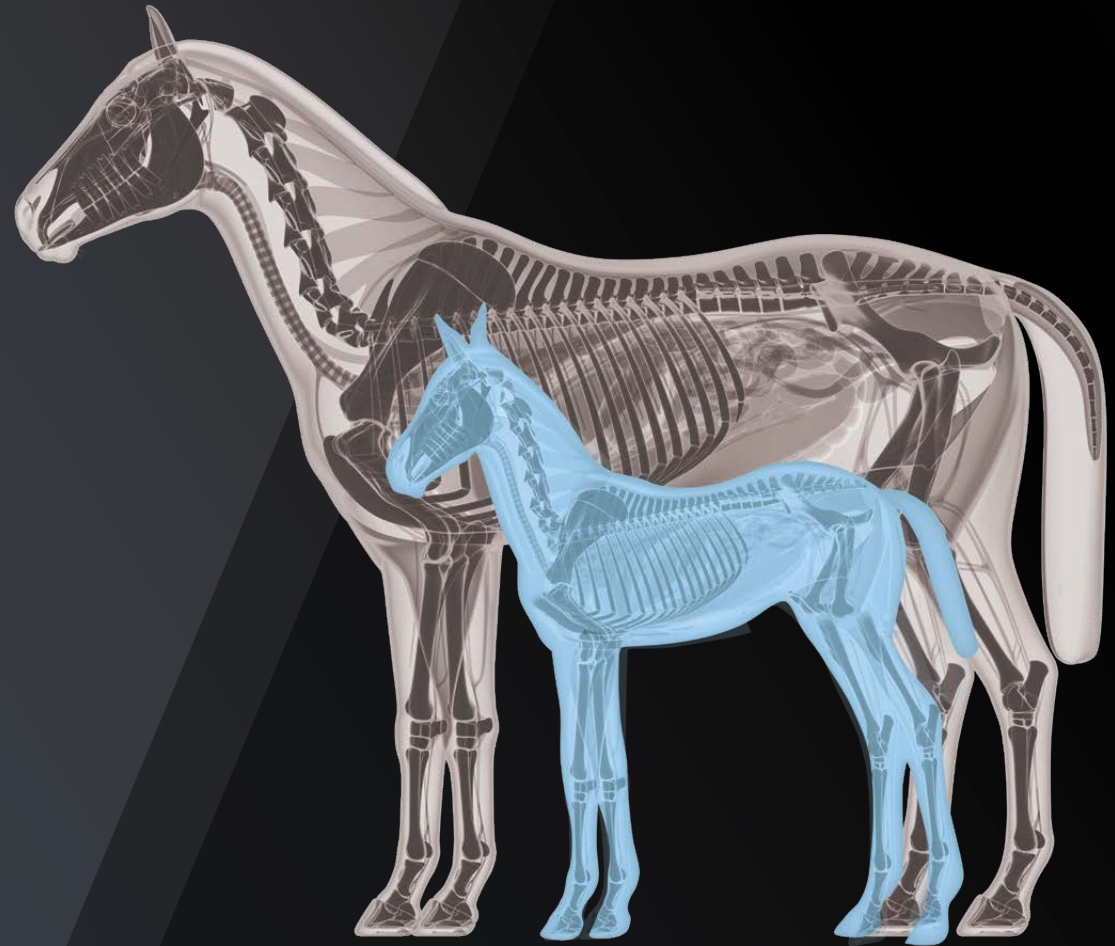

# BREEDING /

In order for a mare to produce a healthy, well-conditioned foal, with sufficient milk to nourish that foal, excellent horsemanship and correct nutrition are required.

For mares being covered with foal at foot the nutritional demands are greater. Supplementation ensures correct nutrient intake which is necessary for fertility. 65% of in utero foal growth occurs during the last three months of pregnancy and supplementation of the mare helps provide essential high quality nutrients, needed for foal development and growth.

To maximise a foal's full athletic potential, they require correct conformation, strong healthy bones and sound joints. The first 18-24 months of a horse's life is a period of rapid growth, particularly of the skeletal system. Supplementation is most effective when used consistently throughout this period of intensive growth.

- > **SUPPORT SKELETAL DEVELOPMENT**
- > **YOUNGSTOCK PREPARATION**
- > **OPTIMISE GROWTH LEVELS**
- > **MAINTAIN GUT HEALTH**
- > **IMMUNE SYSTEM**

# FRISKA FOAL

Multivitamin and prebiotic syrup to support foal development and digestive health

## IDEAL FOR

- > Complementing mares milk in all foals up to weaning
- > Foals during periods of stress such as:
  - Travelling
  - During the mare's foal heat
  - Periods of ill-thrift

## FEATURES & BENEFITS

- > **Folic Acid & B12** – in combination have a key role in haemoglobin function
- > **Vitamins B1, B2 & B6** – supporting metabolic function
- > **Vitamin A** – to aid mucosal development and ocular health
- > **Vitamin D** – essential for calcium absorption and vital for immune defence
- > **Vitamin E** – a powerful antioxidant to support the immune and nervous systems
- > **Inulin** – Prebiotic to aid the development of beneficial bacteria in the hind gut

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be given daily.

Bodyweight	Type	Daily Amount
<200kg*	Foals	6ml

## NUTRITIONAL ANALYSIS

Vitamins	per kg	per 6ml
Vitamin A	700,000 I.U.	5,000 I.U.
Vitamin D	105,000 I.U.	750 I.U.
Vitamin E	9,800mg	70mg
Vitamin B1	1,120mg	8mg
Vitamin B2	420mg	3mg
Vitamin B6	420mg	3mg
Vitamin B12	2,100µg	15µg
Calcium D-Pantothenate	2,100mg	15mg
Niacin	1,400mg	10mg
Folic Acid	560mg	4mg
Biotin	22,400µg	160µg
Vitamin C	14,000mg	100mg

Very palatable which can aid the handling of foals

For the optimal start in life

# CAL-GRO

Support the mare and developing foal through pregnancy and lactation with key minerals and antioxidants

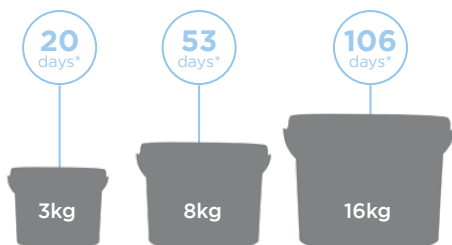

## IDEAL FOR

- > In-foal or lactating mares

## FEATURES & BENEFITS

- > **Calcium & Phosphorus** – in the ideal ratio of 2:1 to optimise bone growth
- > **Vitamin E** – a powerful antioxidant proven to be beneficial for colostrum quality
- > **Manganese** – required for synthesis of chondroitin sulphate and therefore important for healthy joints
- > **L-Lysine** – important for sufficient milk production
- > **Silicon** – to support tendon and ligament elasticity
- > **Chelated Copper** – vital throughout pregnancy to maximise the foal's own stores
- > **Zinc** – supports the immune system

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Type	Daily Amount
450 – 600kg*	In-foal / lactating mares	150g
200 – 450kg	Yearlings / 2 year olds	100g
<200kg	Foals	100g

## NUTRITIONAL ANALYSIS

Vitamin	per kg	per 100g
Vitamin E	10,000mg	1,000mg
Trace Elements (source in brackets)	per kg	per 100g
Copper (Copper (II) Chelate of protein hydrolysates)	2,000mg (16,670mg)	200mg (1,667mg)
Manganese (Manganese Chelate of protein hydrolysates)	2,500mg (16,670mg)	250mg (1,667mg)
Zinc (Zinc Chelate of protein hydrolysates)	5,000mg (33,330mg)	500mg (3,333mg)
Amino Acids	per kg	per 100g
L-Lysine monohydrochloride	120,000mg	12,000mg
DL-Methionine	15,000mg	1,500mg
Technological Additives	per kg	per 100g
Clinoptilolite	30,400mg	3,040mg

Supporting the mare and foal through pregnancy and beyond, for benefits that last

# V.S.L. LIQUID

Antioxidant and amino acid combination to support mares and stallions throughout the breeding season

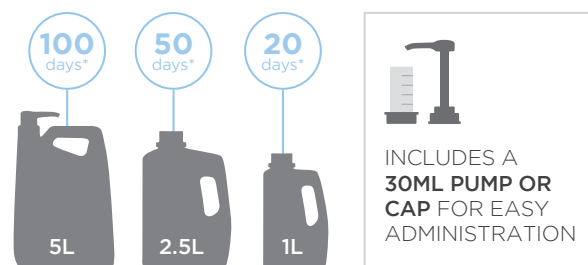

## IDEAL FOR

- > Mares and stallions where fertility might be of concern
- > Breeding stock on reduced turn out
- > Long-term use

## FEATURES & BENEFITS

- > **Vitamin E, Selenium & Lysine** combined;
  - Supports fertility in both mares and stallions
  - Delivers the nutrients required for optimal colostrum quality and adequate milk production
  - Supports muscle function in both mares and stallions

## SIZES AVAILABLE

## FEEDING DIRECTIONS

To be mixed daily with feed.

Bodyweight	Type	Daily Amount
450 – 600kg*	Adult horse / mares in-foal	50ml
300 – 450kg	Small horse / ponies	25ml
200 – 300kg	Yearlings	25ml

## NUTRITIONAL ANALYSIS

Vitamin	per kg	per 50ml
Vitamin E	45,000mg	2,250mg
Trace Element (source in brackets)	per kg	per 50ml
Selenium (Sodium Selenite)	10mg (22.4mg)	500ug (0.5mg)
Amino Acid	per kg	per 50ml
L-Lysine Monohydrochloride	50,000mg	2,500mg

Supporting fertility in mares and stallions

# STABLE ESSENTIALS

Coat and hoof condition are important to all horse owners and are particularly key in competition and sales horses. Foran Equine offers a range of hoof oils, shampoos, creams and gels to help you ensure your horse looks at their best.

Minor injuries are common in horses and an essential role of any owner is to deal confidently and efficiently with these mishaps. For these situations, a well-supplied first aid kit is essential.

Foran Equine provides all the high quality supplies you'll need for every eventuality.

## ANTIPHLOGISTINE

Traditional warm paste dressing

## ARNICA & ALOE VERA LEG GEL

Cooling and soothing gel with arnica and aloe vera

## CRIB HALT GEL

Easy to apply, proven anti-cribbing gel

## CRIB HALT CAPSAICIN FREE

Easy to apply, proven anti-cribbing gel

## EQUINE BODYWASH

All-purpose conditioning and detangling shampoo

## FLEXI HOOF & HEEL CONDITIONER

A rich nourishing conditioner to maintain hoof flexibility

## ICE-CLAY

Easy to use, cooling and soothing leg clay

## KENTUCKY HOOF OIL

Premium hoof oil for hoof health and shine

## M.R.S.

Skin protecting ointment with tea tree oil

## NO-BITE CREAM

Cream deterrent to stop mane and tail biting

## EAZI-CARE DRESSING

Individually wrapped cotton pads containing tragacanth and boric acid, to draw and clean wounds

## EAZI-WRAP

Economical, self-adhesive, strong bandage

## VETERINARY COTTON PADDING

Strong, absorbent  
cotton wool padding

# FOR-VALUE

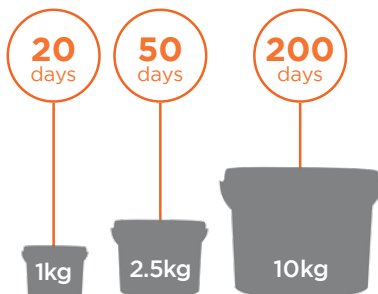

A range of products  
formulated for every day  
nutritional requirements

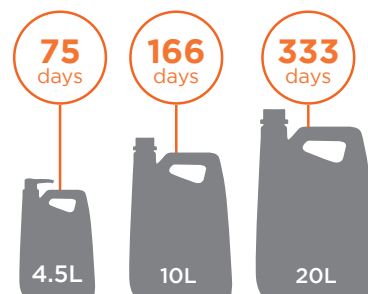

## VITAMIN E, SELENIUM & LYSINE

A powdered supplement  
supplying Vitamin E,  
Selenium and L-Lysine

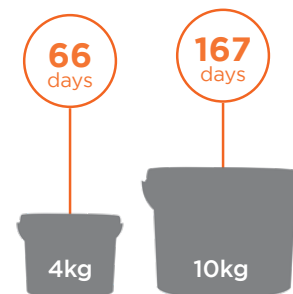

## LINSEED OIL

Cold pressed premium  
Linseed Oil

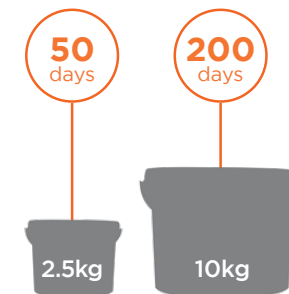

## EQUI-SALTS

Balanced electrolytes  
to support recovery

## VITAMIN E

A powdered supplement  
providing Vitamin E

# TESTIMONIALS

“

Foran Equine's PRE-FUEL and REFUEL is the perfect performance combo. PRE-FUEL provides my horses with the fuel they need to perform at their best. REFUEL supports their recovery between competitions so they can keep giving their all. I use PRE-FUEL and REFUEL as part of my strategic training routine.

Bertram Allen, International Showjumper & Foran Equine Ambassador

*Bertram Allen*

”

“

An extra 1% in our sport makes a big difference, and Foran Equine's products helps us achieve that by supporting our horses at every stage of the training, competition and recovery process. This helps our equine athletes maintain optimal performance throughout the busy competitive season.

Scott Brash, Foran Equine Ambassador

*Scott Brash*

”

“

We find that giving COPPER-MAX regularly throughout the season helps to keep our horses performing and looking at their best. At Hambleton Lodge we only use products that are race safe and of top quality, and Foran Equine ticks that box.

Kevin Ryan, Trainer

”

“

Foran Equine have supplied Wardstown Stud with a wide array of products for a number of years. We find their supplements and healthcare products to be of top quality and highly effective, not only are we delighted with the product offering but we find their supply and after sales service to be excellent.

Mark & Elaine Clarke, Wardstown Stud
